**APPROVAL OF STATE ENGINEER**

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This temporary permit is issued pursuant to NRS 533.504 and is subject to all existing rights on the source. It is understood that this right must allow for a reasonable lowering of the static water level at permittee's well due to any other ground water development in the area. The well shall be equipped with a 2-inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. The State retains the right to regulate the use of the water herein granted at any and all times.

The well must be sealed from ground level to 100 feet in accordance with NAC 534.380.

This temporary permit is issued pursuant to the provisions of NRS 533.504 and will expire 1 year after the approval of the permit at which time all rights herein granted shall revert to the ground water source.

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this temporary permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 0.138 cubic feet per second, and 11.2 acre-feet annually, or sufficient to water 500 head of cattle.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:
